

OCULIZER - ANALYSE DES SCÈNES DU CONCERT

Source : oculizer.log
Période du journal : 2026-08-05 09:36:23 à 2026-08-05 10:54:04
Chronologie effective : 1:17:37.4
Activations effectives : 1418
Morceaux identifiés : 25 (1:10:07.7 de musique)
Annonce/off : 6:29.2
Fragments courts exclus : 8 (1:00.5)

MÉTHODE

Les durées sont reconstruites depuis chaque ligne « Automatic scene request ... activated » jusqu'à l'activation effective suivante. Les cibles identiques consécutives sont fusionnées. Les scènes announcement et off délimitent les morceaux. Huit fragments musicaux de moins de 60 secondes, encadrés par des séparateurs, sont considérés comme des reprises temporaires de détection pendant les annonces. Ils restent inclus dans les statistiques globales du journal, mais sont exclus de la numérotation des morceaux.

CONCLUSIONS

- 1418 activations en 1:17:37.4 : une toutes les 3.28 s.
- Pendant les morceaux : une activation toutes les 3.06 s.
- Première scène en durée : discolaser (7:39.9, 10.93 %).
- Première scène en fréquence : fairies (145 activations).
- Les sept premières scènes occupent 60.6 % de la musique.
- Scène v6 inutilisée : bass_hopper_blue.
- Les passages moyens très courts indiquent une forte rotation visuelle.
- Les légers dépassements des limites de 8 ou 15 s sont compatibles avec la cadence du routeur et la durée des impulsions OSC.

Rapport généré automatiquement ; les durées sont des estimations reconstruites.
